

## Forward

## Forward

Meet Forward. A luxury woven and sustainable fabric made from post-consumer wool, recycled polyamide and (virgin) linen. Durable, luxurious and suitable for almost every type of upholstery.

What makes this textile sustainable is the recycled wool and polyamide, the wool is post-consumer.

The production process is environmental friendly and it gives previously used woolen products a second life. It is woven by one of our trusted partners, an Italian textile craftsman who has been building his expertise for over a century and is widely renowned for this highly specialized process.

The yarns are carded from regenerated woolen products. Carding is a special way of processing the yarns, resulting in a yarn and eventually an upholstery fabric like Forward. It distinguishes itself from other virgin woolen yarns and qualities.

During use, a certain hairiness may appear, this has no further influence on the durability of Forward, it is a property of such woolen qualities. Because of this production process, each batch is unique and colour variations may occur.

Due to its composition Forward passes the BS5852 cigarette (part 0) & match (part 1) test and also the EN1021 cigarette (part 1) & match (part 2) test.

Forward has a melange aspect and is available in a wide and trendy colour line from stock.

**Fabraa** Upholstery fabrics with a conscience. We make sustainable choices easy by offering a wide range of high-qualty, affordable upholstery fabrics with consideration for the conditions throughout the supply chain.
